

A net for a macaron box. It consists of four identical, symmetrical, leaf-like shapes arranged in a cross pattern. Each shape has a small notch at one end and a small protrusion at the other. The shapes are connected at their inner points by two dotted lines that intersect at the center, forming an 'X' shape. The outer edges of the shapes are solid lines. There are two short, straight lines drawn on the inner surface of each leaf shape, one near the notch and one near the protrusion.

Cut along the solid line.
Fold on the dotted lines.
